DETAILED ACTION

Applicant's election of Group I (claims 1 to 7 and 15 to 20) in Paper # 5, filed 6/25/03, has been acknowledged. However, a redefined restriction requirement of the correct classification is detailed above.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 15-20, drawn to a three dimensional (3-D) integrated chip system, classified in class 156, subclass 59.
- II. Claims 8-14, drawn to making a wafer bonding method, classified in class 438, subclass 118.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the process as claimed can be used to make other and materially different product such as one that comprises metallic bumps on opposing surfaces of adjacent wafers each including one or more IC devices.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2826

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
